Exercise

Complete the following table:

x	1	2	3	4	5	6	7	8	9	10
5										
10										

1.5 Multiplication by regrouping:

This method can be used by multiplying a two digit number.

Consider the following multiplication

53×7

53 can be regroup into 5 tens and 3 ones.

Hence, 53×7 can be written as $(50 + 3) \times 7$

$= (50 \times 7) + (3 \times 7)$

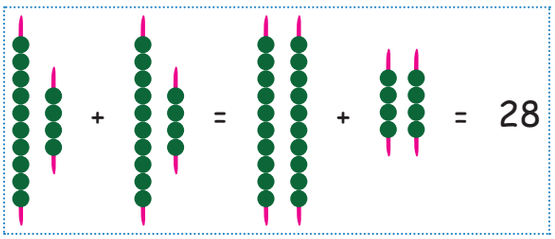

$= 350 + 21$

$= 371.$

Example

14×2 = ?

That is 2 Times 14

$14 \times 2 =$ 2×1 Ten + 2×4 Ones

$= 2 \times 10 + 2 \times 4 = 20 + 8$

$14 \times 2 = 28$

Exercise

1. Multiply the following numbers by regrouping

(i) 75×8 (ii) 26×5 (iii) 372×6 (iv) 402×7 (v) 752×3
