1.7 Lattice multiplication:

L3J2B4

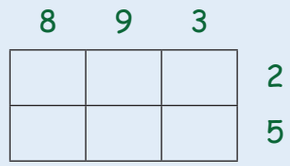

Lattice multiplication is helpful while dealing with numbers with more than two digits.
We follow the following steps in Lattice multiplication.

Step 1: Write the numbers to be mutiplied as follows.

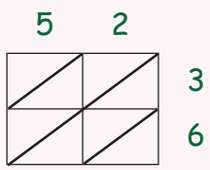

(i) 52 × 36

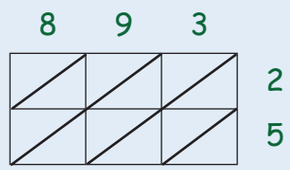

(ii) 893 × 25

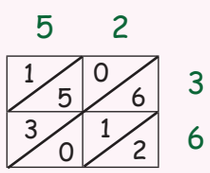

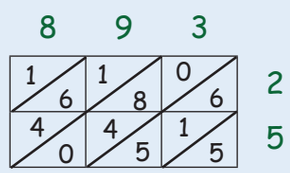

Step 2: Draw diagonals of the square.

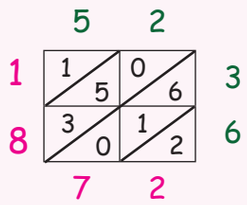

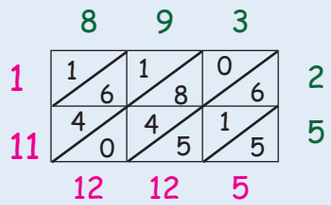

Step 3: Mulitiply the numbers and write them in the cells as shown below

Step 4: Find the sum of each diagonal and write as follows.
