3.2 Conversion of weight in gram and kilogram.

We use standard units such as milligrams, grams and kilograms to measure weight.

Heavier things are measured in **kilograms**. It can be shortly written as **kg**

Lighter things are measured in **grams**. It can be shortly written as **g**

1 kilogram = 1000 gram

1 gram = 1000 milligram

Do You Know

$\frac{1}{2}$ kg = 500 grams

$\frac{1}{4}$ kg = 250 grams

$\frac{3}{4}$ kg = 750 grams

Conversion of weight

= 

1kg = 10 packets of 100g

= 1000g

V4N2I3

= 

2kg = 20 packets of 100g

= 2000g

Find the number of 100g packets used to fill 3kg of rice.
