I. Water -A primary source of life

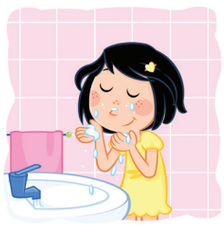

Water is one of the most important resources on Earth. All living things like small organisms, plants and animals need water to survive. People use water for various purposes. Rain is one of the main sources of water.

Do you know?

- A camel can drink 60 to 100 litres of water at a time and live without water for several days.
- World Water Day is observed on 22nd March.
