

Son: Interesting. Is **Gold Ore** a mineral?

Father: Yes it is. **Gold** is extracted from **Gold Ore**. It is considered as one of the most precious mineral.

Son: That's why it is used in making jewels.

Father: You are right. **Gold** is also a very good conductor of electricity and it is found in small amounts in electronic devices including mobile phones, televisions and so on.

Son: Oh is it?

Think

Are there any minerals available in your district? What are they?
