Exercise

a. Divide 8 balls into a group of 2 each.

$8 \div 2 = \square$

b. Divide 15 oranges into a group of 3 each.

$15 \div 3 = \square$

c. Divide 20 cups into groups of 5 each.

$20 \div 5 = \square$

Activity

- Give a handful of tamarind seeds to a child and keep some number chits in a box. Let him/her pick out a number chit from the box.
- Now let him/her make it to groups as per the number in the chit taken from the box.
- Once the child has finished grouping ask him/her to write the division fact on the blackboard.
