How many laddus?

How many eggs?

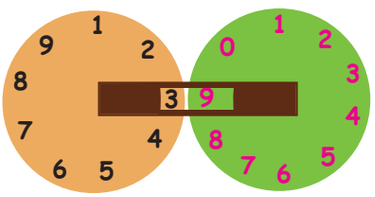

Game

Number wheels

Things needed

- Number wheels as shown in the figure.
- 99 Beads / seeds / sticks
  (Locally available materials) - 2 sets.

Procedure

- Divide the class into 2 groups and give 99 beads/seeds/sticks to each group.
- Call one student from each group to form a number by rotating the spin wheels.
- The respective group has to arrange the beads/seeds/sticks in tens and ones according to the number obtained.
  Example: If the first group obtains the number 34, they have to arrange 3 tens and 4 ones.
- Continue the process among groups for other numbers.
- Let them compare the numbers obtained in both groups to say which is bigger and smaller.
