Stone

Sandiya and Kaviya are playing with pebbles.

CX17YZ

Pebbles are a type of stone.
Stone is a hard substance found on earth.
There are many kinds of stones. We use stone in many ways.

Mahabalipuram is well known for its stone sculptures.

Stones are used to build houses.

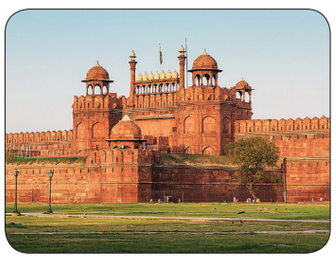

Marble is a kind of stone. It is used to make floors and buildings.

Small stones called gravel are used to make roads.

Stones are used to make statues.

Red stone is also a type of stone used in many buildings.

We can make jewellery using precious stones called gems.
