Sand

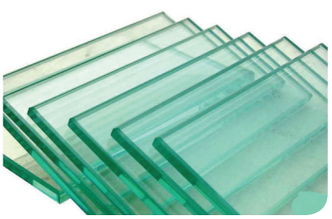

Ravi and Prabu are playing in the sand. Do you like playing in the sand?

Sand is formed from broken pieces of rock over a long period of time.

Sand is mixed with cement to construct buildings. Sand is also used in making glass. Beautiful sculptures can be made with the sand. This is called sand art.

Sand clocks were used to measure time in the olden days.

Shall we make a sand clock?

- ☞ Take two similar bottles.
- ☞ Make a hole on the lid of both bottles with the help of your teacher.
- ☞ Fill one half of one bottle with sand.
- ☞ Paste both bottles with tape as shown in the picture.
- ☞ Now the sand clock is ready.
