Let us play with a sand clock

Find out how many times you can jump by the time the sand moves from one bottle to the other. Use the clock to measure the time taken for other activities.

Metals

Surya is riding a bicycle. Bicycles are made of metal. Metal is a hard and shiny material. We use metals in our daily life in many ways. Look at the following examples.

Ring

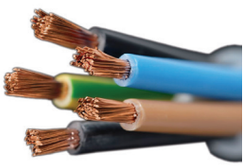

Vessel

Tap

Car

Wire

Coin

Circle the things made of metals.
