Travel Through

The teacher blindfolds one of the students and asks him/her to take an object and identify the objects by asking questions based on the properties as follows.

Teacher : Is the object in your hand flat or round?

Student : The object is _____.

Teacher : Now feel the sides. How many sides it has?

Student : It has ___ sides.

Teacher : Are the sides equal, say yes or no ?

Student : _____.

Teacher : Can you guess the shape of the object now?

Student : It's shape is _____.
