Add using abacus

What is the total number of seeds collected by team B in chance 1?
Team B consists of two players Ezhisai and Agilan. They collected 14 and 16 seeds in chance 1. Hence we need to add 14 and 16 using Abacus followed by addition procedure. Put 14 beads in the abacus first and then add 16 beads to it.

1	4

	T	O
	1	4
+	1	6

Step 1: Add ones

If we add ones, we get 10 ones.

1	10

	T	O
	1	4
+	1	6

Step 2: Regroup the ones

Regrouping ones we get 1 ten and no ones. So, write 0 in ones place and carry over 1 ten in tens place.
