Earth

The earth is the home for plants, animals and for all of us. We grow our food on the land. We move from place to place on the land and play on it. The land gives us all we need to make the different things that we use.

Avoid Using Plastic

Water

Water occupies a major part of the earth. All living things in the world need water to live. We get water from the rain. Water is used to drink, cook, clean things, bathe, swim and grow crops. Can you swim? Learn to swim with the support of your elders.

Many kinds of plants and animals live in water.

Starfish

Seahorse

Lily

Lotus
