1.3 Repeated Addition

Travel Through Footwear Shop

Mugilan and Yazhini went to a footwear shop. By the time they entered the shop they saw a few of their friends buying footwear. To their surprise, they found the shop was left empty after sometime.

So, they returned home without buying footwear. Can you say, why? Read the following conversation. Mugilan and Yazhini explained the situation to their mother.

Yazhini : Mom, I saw chitu , She flew away with 2 sets of 2 slippers (2+2=4)

Mother : Oh! I see.

Mugilan : I saw pussy in the shop. It went away with 3 sets of 4 slippers (4+4+4 = 12)

Mother : Is it so?

Yazhini : Mom! The fly selected 4 sets of 6 shoes. (6+6+6+6= 24).

Mother : What happened next?

Mugilan : Spider chose 5 sets of 8 shoes. (8+8+8+8+8=40) If none of the slippers was left in the shop. Can you guess who came next ?

Yazhini : Finally Centipede came and emptied the shop.
