3.4.Types of force

Contact Force

When a force is applied by touching the object, it is called contact force.

Eg : Lighting a match stick

Contact force is classified into three.

1. Muscular force 2. Mechanical force 3. Frictional force

Non-Contact Force

When a force is applied without touching an object, it is called non-contact force.

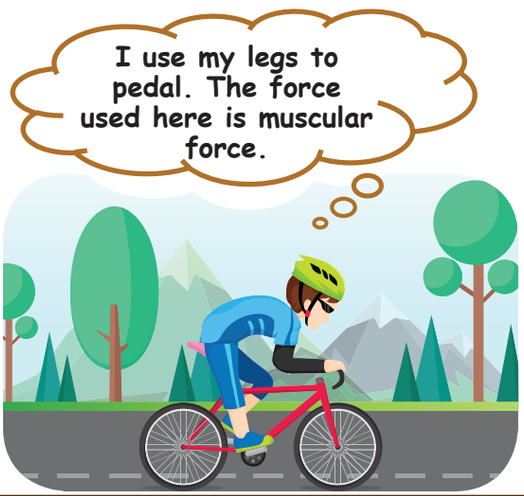

Eg. Vaccum cleaner, Magnet.

Non - contact force is classified into two.

1. Gravitational force 2. Magnetic force

Muscular force

The force applied by using the parts of our body is called **muscular force.**

Mechanical force

The force applied by a machine is called **mechanical force.**

Example:

Using bulldozer to dig ground

Grinding using a mixer grinder
