4.3 Simple Scientific investigations in Daily Life

The curiosity of science starts from home. It is promoted by simple scientific investigations of the things that the children see around them or use daily like, why the leaves are green in colour? What is the difference between the sun and the moon? How does the television work?

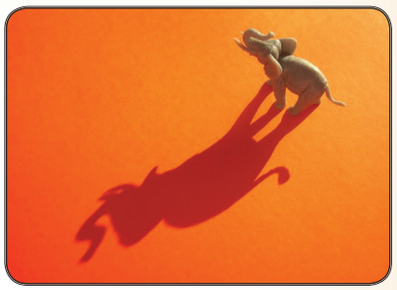

Shall we learn about few simple investigations?

4.3.1 Real and Shadow

For what ?

To learn how the shadows are formed.

How?

1. Make the classroom dark.
2. Light a candle.
3. Place a toy near the candle. What do you see?
4. Move the toy away from the candle. What do you see? Move the toy closer to the candle. What do you look at?
5. Experiment and see what happens to the shadow if the light source is dim?

Complete the sentence:

- Moving the toy closer to the candle made its shadow _____.
- While moving the object away made its shadow _____.
- The big candle is bright and gives _____ shadow.
- The small is dim and gives _____ shadow.

Lava in a Cup

You will Need: A tall glass cup, 1/4 cup vegetable oil, 1 teaspoon salt, water, food colour.

What to do?

1. Fill the glass about 3/4 with water .
2. Add about 5 drops of food colour (Red).
3. Slowly pour the vegetable oil into the glass. See how the oil floats on top.
4. Sprinkle the salt on top of the oil.
5. Watch blobs of lava move up and down in your glass! Add another teaspoon of salt to keep the effect going.
