Samudra: How does one get treatment in this vehicle?

Mother: We do not get treatment. But we can get first aid.

Samudra: First aid?

Mother: **First aid** is a life saving treatment that is given before the actual treatment of a victim. This ambulance contains a doctor, a nurse and all the first aid devices and medicines.

How can one call the **ambulance?** ?

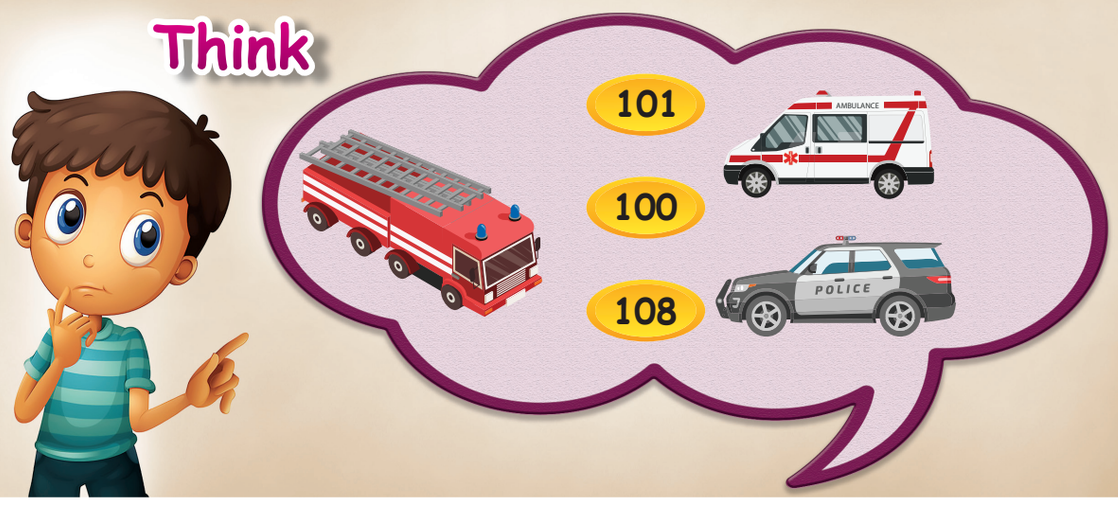

LET US KNOW

Good Samaritan Law

Good Samaritan Law was executed by Central government in the year 2014 to safeguard those who help the victims of accidents and other calamities.

According to this law, any person can help the victim and accompany him/her to the hospital. The person need not reveal his/her name or pay for the victim's treatment. This law helps the people to come forward to help others who are in need, without the fear of police, rules and regulations and so on.
