Fire safety

'Fire is the man's marvelous creation'

- Fire can create and destroy the things.
- Fire is used in many ways in our everyday life. We should handle it carefully.

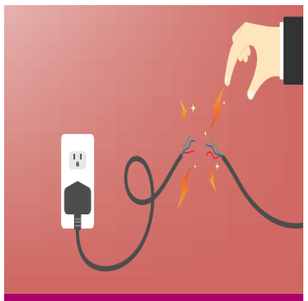

Reasons for fire accidents

Fire accidents can occur in the following ways:

Crackers and explosives

Electrical short circuit

Leakage in gas cylinders

Highly inflammable things

How does the **forest fire** occur?

Precautions to avoid fire accidents:

1. We should handle the highly inflammable things carefully.
2. The person who cooks can wear cotton clothes. Some types of clothes can easily catch fire.
3. We should close the cylinder valve after cooking. If we detect leakage in gas cylinders we will open the doors and windows to ventilate our house.
4. Don't play with fire.
5. We should be cautious and careful while firing crackers and elders should be with us when we fire crackers.
