line of symmetry

Note that one half of the shape is exactly like the other half. The line which divides the figure into two exact halves is called ***the line of symmetry***.

The following letters are non symmetric and does not have line of symmetry.

F G J L N P Q R S Z

Try this

Make the paper cut outs of the shapes shown below with the help of your elders and keep them infront of a mirror and observe the image formed in the mirror. You could see the other half of the image.

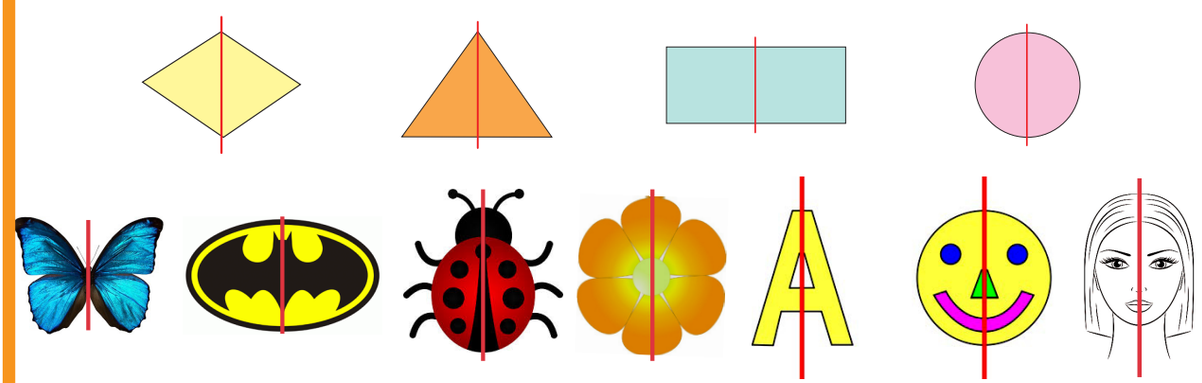

Symmetrical shapes

Definition

If a shape can be folded or divided into half so that the two halves match exactly then such a shape is called a symmetric shapes.

Example: 1
