Let us make a rectangle by folding a paper

Take the red coloured piece which was kept aside. Observe its sides. Fold the opposite sides of the rectangle.

What do you observe? The sides coincide. Now we get opposite sides equal. Hence in a rectangle, opposite sides are equal.

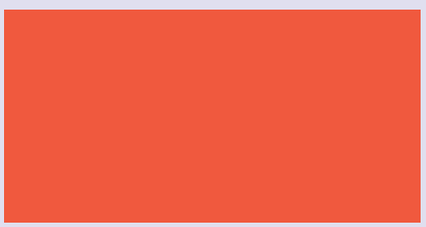

Fold the opposite corners as we did in the square. Observe the crease. It shows the diagonal of the rectangle.

properties of a rectangle

The properties of a rectangle are as follows

- Rectangle has four sides.
- Two opposite sides are equal.
- Rectangle has four corners.
- Rectangle has two diagonals.
- Two diagonals are equal.

Let us make a triangle by folding a paper

Fold the square along any of these diagonals to form a triangle.

Observe the Sides and corners of the triangle.

A triangle has **three** sides and **three** corners.

Cut the paper and make triangles of different kind.

Observe the length of the sides of the triangle.

Let us know

Isosceles triangle

Equilateral triangle

Scalene triangle

Try This How many triangles can be made out of this square paper?
