Let us speak

3.2 Force

Force is a push or a pull on an object which make it move, changes its shape or stops it from moving.

- Force involves an interaction between two or more objects.
- Force can lift or drop an object.

Without force, we can't move any object.

Observe and Discuss

3.2.1 Push

Look and say: What kind of actions do the pictures denote?

Here, all the pictures show pushing action.

When a force is applied in the direction of an object, it is called **push**.
