Understanding the equivalences of $\frac{2}{4}$ and $\frac{1}{2}$ and of $\frac{2}{2}$, $\frac{3}{3}$, $\frac{4}{4}$ and 1

Four friends were walking in a Sunny day. All are became thirsty so they went to a fruit vendor and bought a watermelon. They sliced it into four equal parts and ate it. how they shared their parts with themselves

U8Y6M8

- Take a square sheet of paper and fold it into two equal parts. Colour one part of the paper

Fraction of coloured portion = $\frac{1}{2}$

- Now observe keenly, the fraction of coloured portion = $\frac{2}{4}$

  There is no change in the paper
