LIFE OF ANIMALS

Unit 2

Learning Objectives

After the completion of this unit students will be able to

- understand group behaviour in animals
- know adaptation in animals
- explain the structure of insects.
- list out special senses in some animals
- know about animals active at night
- understand parental care in animals

T3C9S3

Introduction

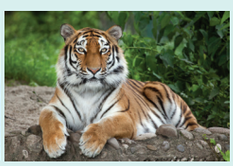

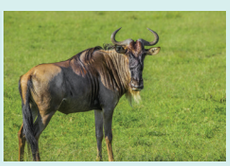

Have you ever wondered why a dog drools on seeing food? Why cuckoo sings only during summer? Why baby birds open their mouths when the mother returns to the nest?

Each animal has some unique behaviour. Animal behaviour includes the activities of an animal and its interaction with other organisms. E.g. Blinking, eating, walking and flying.

Group Behaviour in Animals

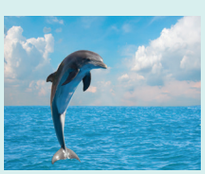

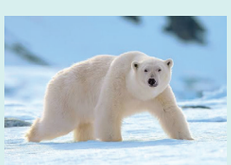

ACTIVITY

Match the animals with their group behaviour

Lives alone

Lives as part of a group
